Objective

From the moment I produced "hello world" in the console of my first project, I knew I was hooked into the world of software development. What started as "Hello World" has become a full-fledged passion that only becomes more exciting. Below you will find projects that display my skills in software development and design

Experience

Tool Expo- Web Developer/Designer (7/2021- current)

- Attracted users to website with professional, user-friendly designs that increased page views and time on page.
- Verified functioning of pages by testing features after updating code.
- Managed renewal of domain name registrations.
- Help maintain and clean up online E-commerce store

Portfolio site

- Portfolio Website created using Bootstrap, Html, CSS, and JavaScript
- Mobile friendly and responsive to all device types
- Live Site- <https://damell01.github.io/portfoliowebsite/>

Bcea Website

- Website created for a local based client using a content management system (Wix)
- Includes custom Html and CSS for google maps and forms
- Live site- Bcea.online

Chatroom

- Web-based Full-Stack chat application that displays when user joins or leaves conversation.
- Built using Html, CSS, Node.js, Express, and Socket.IO
- Uses web sockets to display messages in real time with other users
- Live version- <https://github.com/damell01/Chatroom-App>

EDUCATION

- University of South Alabama: Information Technology (Web Focus)
- The Odin Project: A full-stack JavaScript curriculum that teaches basic-advanced HTML, CSS, and. JavaScript with project-based learning.

- Udacity Web Development Nanodegree: An online course that covers UX/UI design and JavaScript
